 The number for the surname. If the individual has no number assigned to the first letter of the surname, the name will be for example the index and will be in the 47 segment of the index. The code number _____
 The system below is used:

Editing Guide

The letters a, e, i, o, u, y, w, and h are *not* coded
The first letter of a surname is *not* coded

Every Soundex number must be a 3-digit number. A name yielding no code numbers, as Lee, would thus have to be L000. One yielding only one code number would have two zeros added, such as Kuhne, coded as K500; and one yielding two code numbers would have two zeros added, as Ebell, coded as E140. Not more than three digits are used, so Ebelson would be coded as E142, not E1425.

When two key letters or equivalents appear together, one key letter immediately follows or precedes as equivalent; the two are coded as one letter, by a single number, as follows: Kern, coded as K400; Buerck, coded as B620; Lloyd, coded as L300; and Schaefer, coded as S160. Scott would be S300. Jackson, J250.

If several surnames have the same code, the cards for them are arranged alphabetically by given name. There are divider cards showing most code numbers, but not all. For instance, one divider may be numbered 350 and the next one 400.

Such prefixes to surnames as "van," "von," "De," "del," "de la," "dela," or "du" are sometimes disregarded in alphabetizing and coding. Researchers are advised to check possible spellings of a name.

The following names are examples of soundex coding and are given only as illustrations.

Native American, Orientals, and Religious Nuns

Researchers using the Soundex system to locate religious nuns or persons with American Indian or oriental names should be aware of the way such names were coded. Variations in coding differed from the normal coding system.

Phonetically spelled oriental and Indian names were sometimes coded as if one continuous name, or if a distinguishable surname was given, the names were coded in the normal manner. For example the American Indian name Shinka-Wa-Sa may have been coded as "Shinka" S 520 or Sa (S000). Lee Wan Bow may be found under L 000 or L 510. Researchers should investigate the various possibilities of coding such names.

Religious nun names were coded as if "Sister" was their surname if no surname was given. So Sister Mary Boniface would be coded "S236". but Sister Mary Boniface Moran would be found under M 650 for Moran.

The names of state were abbreviated in the fashion of the modern postal state designations; names of countries are written in total. Other abbreviations used by the census enumerators can be found in Appendix II of the various National Archives' Federal Population Census Catalog

Expression of Appreciation is given to all the members of the Genealogical Forum of Oregon, Inc. who worked on this project over an eleven year period and to the following individuals and Genealogical Societies.
